

# Severity

Medium

# Analysis Summary

CVE-2022-28890

Apache Jena could allow a remote attacker to obtain sensitive information, caused by improper handling of XML external entity (XXE) declarations by the RDF/XML parser. By sending a specially-crafted request, a remote attacker could exploit this vulnerability to obtain the external DTD information, and use this information to launch further attacks against the affected system.

# Impact

- Information Disclosure

# Indicators Of Compromise

CVE

CVE-2022-28890

# Affected Vendors

- Apache

# Affected Products

- Apache Jena 4.4.0

# Remediation

Upgrade to the latest version of Apache Jena, available from the Apache Web site.
