

Severity

High

Analysis Summary

CVE-2022-27656

SAP Web Dispatcher and SAP Netweaver AS for ABAP and Java (ICM) are vulnerable to cross-site scripting, caused by improper validation of user-supplied input by the in administration UI. A remote attacker could exploit this vulnerability using a specially-crafted URL to execute script in a victim’s Web browser within the security context of the hosting Web site, once the URL is clicked. An attacker could use this vulnerability to steal the victim’s cookie-based authentication credentials.

Impact

- Cross-Site Scripting
