

Severity

High

Analysis Summary

CVE-2022-26923

Microsoft Windows could allow a remote authenticated attacker to gain elevated privileges on the system, caused by a flaw in the Active Directory Domain Services component. By sending a specially-crafted request, an authenticated attacker could exploit this vulnerability to execute arbitrary code with higher privileges.

Impact

- Privilege Escalation

Indicators Of Compromise

CVE

- CVE-2022-26923

Affected Vendors

- Microsoft

Affected Products

- Microsoft Windows 8.1 x32
- Microsoft Windows 8.1 x64
- Microsoft Windows Server 2012 R2
- Microsoft Windows RT 8.1

Remediation

Use Microsoft Automatic Update to apply the appropriate patch for your system, or the Microsoft Security Update Guide to search for available patches.
