

Severity

High

Analysis Summary

CVE-2022-24437

Node.js git-pull-or-clone module could allow a remote attacker to execute arbitrary commands on the system, caused by a flaw in the use of the — upload-pack feature of git. By sending a specially-crafted argument to the git clone command, an attacker could exploit this vulnerability to execute arbitrary commands on the system.

Impact

Command Execution

Indicators Of Compromise

CVE

CVE-2022-24437
