Analysis Summary

CVE-2022-28837

Adobe Acrobat and Adobe Reader could allow a remote attacker to obtain sensitive information, caused by a use-after-free within the handling of Doc objects. By persuading a victim to open a specially-crafted document, a remote attacker could exploit this vulnerability to obtain sensitive information.

Impact

- Information Disclosure

Indicators Of Compromise

CVE

- CVE-2022-28837

Affected Vendors

- Adobe

Affected Products

- Adobe Acrobat 2017 17.012.30205
- Adobe Acrobat Reader 2017 17.012.30205
- Adobe Acrobat 2020 20.005.30314
- Adobe Acrobat 2020 20.005.30311

Remediation
