Severity

Medium

Analysis Summary

CVE-2022-25169 CVSS:6.5

Apache Tika is vulnerable to a denial of service, caused by improper input validation in the BPG parser. By persuading a victim to open a specially-crafted file, a remote attacker could exploit this vulnerability to cause a denial of service condition.

CVE-2022-30126 CVSS:6.5

Apache Tika is vulnerable to a denial of service, caused by a regular expression denial of service (ReDoS) flaw in the StandardsText class in the StandardsExtractingContentHandler. By persuading a victim to open a specially-crafted file, a remote attacker could exploit this vulnerability to cause a denial of service condition.
